Detailed Action

The drawings submitted on 8-11-00 and 6-22-01 are informal. Formal drawings must be submitted.

Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The claimed invention is free of the prior art of record because the prior art or record does not teach or fairly suggest a cell line comprising a stably integrated recombinant nucleic acid construct comprising a reporter gene operably linked to a DNA-binding protein recognition sequence; and a stably integrated recombinant nucleic acid construct comprising a sequence encoding a fusion protein comprising a DNA binding domain that specifically binds to the recognition sequence, and a conditionally active transactivation domain of CHOP, wherein the DNA binding domain of the fusion protein is located upstream of the conditionally active transactivation domain of CHOP, and which recognition sequence for the DNA binding domain is recognized by GAL4 or LexA..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner's Comments

The instant invention is distinguished from the prior art of record because the instant invention teaches the sequence specific DNA binding domain of the stably integrated recombinant nucleic acid construct that comprises the fusion protein to be upstream of the conditionally active transactivation domain of CHOP. The prior art does not teach or suggest this specific order of components within the claimed recombinant nucleic acid construct.
